**Web Programming and
Development Laboratory PROJECTS**

PROJECT – 1

Aim : Create an Online book store is a web application to allow users to select books through internet and get them delivered to their doorsteps using Servlets, html, css.

It allows registered users to do the following:

- Login
- Browser and query books based on price, title, and category
- Add books to shopping cart.
- Update quantity in shopping cart
- Remove books from shopping cart
- Finalize order for books in shopping cart
- See the status of orders placed in the past - orders history.
- Cancel an order, if status of the order is new.

The following table lists operations and associated objects and files.

Operation	Servlet and Html Files
Login	login.html, login.java
Registration of User	register.html, register.java
Home Page - Displays shopping cart	home.java
Updation of user profile and password	changeprofile.java
Logging out	logout.java
Browsing available books.	browsebooks.java
Querying books on price, title and category	querybooks.java
Adding a books to Shopping cart	addbook.java
Finalizing Order	home.java
Displaying previous - Orders History	ordershistory.java
Displaying items of an Order	orderitems.java
Cancelling an Order	deleteorder.java, orderitems.java

Create a project with html files and corresponding Servlet files. Make use the following concepts to implement project:

1. RequestDispatcher interface to include necessary html and servlet files
2. Use Session Tracking – HttpSession to handle session objects in all the pages
3. Validate the results and retrieve all the operations using a relation database

WEB PAGES

Register :

The registration form is titled "Registration" and is set against a teal gradient background. It includes input fields for a username (Rizwanullah), email (208w1a1299@gmail.com), and two password fields (both masked with ****). There are radio buttons for gender selection (Male, Female, Others), with "Male" selected. The date of birth is set to 20-07-2003. There are also input fields for a phone number (vja) and a country (india). A large address field contains the text "bezawada". A blue "Register" button is at the bottom.
