GUIDELINES FOR DRAFTING MICRO LEVEL SYLLABUS

- 1. The micro level syllabus is framed in order to give a clear insight into the detailed content of the syllabus prescribed for the subject.
- 2. The micro level syllabus is not just simply reproducing the prescribed syllabus from horizontal orientation to vertical orientation
- 3. The micro level syllabus must include every minute heading from the source -Text Book/Reference Book - specifying the source no., chapter no. and page no. in the source
- 4. The micro level syllabus offer guidance to three sections of users, namely, the Teacher that teaches the course, the student who learns the subject and the paper setter who sets the question paper for the semester end examination.
- 5. The micro level syllabus should clearly indicate the full scope of any particular topic such as definition, theoretical explanation, diagram, analysis, derivation, problems etc.
- 6. The micro level syllabus is an important document which must be carefully drafted spending enough time in order to avoid confusion among any of the three sections of users.
- 7. The micro level syllabus must include books/references at the end of the document
- 8. The micro level syllabus must be subjected to a thorough discussion among the Course Coordinator, Module Coordinator, Program Coordinator and the Head of the Department.
- 9. The signed documents may be displayed in the department web site for information to all the stake holders.
